

The Blairmore Graphic

NOV 25 1946

Vol. 1 No. 17

BLAIRMORE, ALBERTA, FRIDAY, NOVEMBER 22, 1946

\$2.00 PER ANNUM

"Serve the Church that the Church May Serve You."

CENTRAL UNITED CHURCH

Rev. James McKelvey, Minister

Services Sunday next:
11.00 a.m., Senior school.
2.00 p.m., Junior school.
7.30 p.m., Public worship.

ST. LUKE'S CHURCH, BLAIRMORE

(Anglican)
Rector: Rev. W. Grainger

Services Sunday next—
Sunday school 12.15 noon

SALVATION ARMY, COLEMAN

Captain and Mrs. T. Smith,
Officers in charge.

Sunday services:

11 a.m., Holiness meeting.
2.30 p.m., Directory class.
3 p.m., Sunday school.
7.30 p.m., Salvation meeting.
Tuesday: 7.30 p.m., Red Shield Auxiliary and Home League.
Thursday: 8 p.m., Praise meeting.
Funerals, dedications and marriages on application to the local officers.

HILLCREST UNITED CHURCH:

Services every Sunday at 3 p.m.

BELLEVUE UNITED CHURCH:

Services at 7.30 p.m. every Sunday.

COWLEY UNITED CHURCH:

Services alternate Sunday mornings at 11 o'clock.

Rev. W. H. IRWIN, Minister.

BELLEVUE BAPTIST CHURCH

Pastor: Rev. Fred Bennett

Sunday school 10 a.m.

Morning worship 11 a.m.

Evening service 7.30 p.m.

Midweek meeting:

Wednesday 7.30 p.m.

A cordial welcome awaits you.

HEALTHFUL THINKING

Morbid fixation on the functioning of the body is not the way to true health, says an announcement from the department of national health and welfare. The department quotes a leading authority, who describes health as a "perfectly natural and unconscious state of mind and body, evident in a sense of well-being." A healthy person, it is pointed out, enjoys activity, has an exploratory interest in life, and is well fitted to stand up to adversity, to endure and to overcome difficulties, whether mental or physical.

PLAY AND HEALTH

While there's a thrill in watching a sports event, there's more health in actual participation in games. This reminder is issued by the department of national health and welfare, Ottawa, in a bulletin which calls on those interested in health to "climb down from the grandstand and take part in some game." Fun and fitness, the department points out, go hand in hand.

SEALED IN by the Vita-Fresh Process to ensure roaster freshness. So when you buy Maxwell House Coffee in the Super-Vacuum Tin you get extra freshness and flavor.

COWLEY HAPPENINGS

On Wednesday of this week 125 head of cattle were shipped from the stock yards here to Calgary.

Mrs. Arthur Gray left on Thursday by train for Calgary where she intends spending a few weeks.

One of the prettiest weddings of the year took place in St. Alden's Anglican church, Cowley, on Saturday, November 16th, at 11 a.m., when Evelyn June, eldest daughter of Mr. and Mrs. Fred Burwell, of the Cowley Airport and William Musgrave, younger son of Mr. John Musgrave and the late Mrs. Musgrave, Cowley, were united in the holy bonds of matrimony with Rev. Mr. Cyril Clarke officiating.

The bride who was given in marriage by her father, was adorned in a floor-length gown of ivory duchess satin with over-draped skirt of silk net; the graceful sweeping bridal veil of old lace and carrying a bouquet of pink opelia roses and carnations completed her attire. Mrs. F. A. Tustian, organist, played the wedding march. The bride was attended by three bridesmaids: Miss Doris Musgrave, sister of the groom, wearing a floor-length dress of heaven blue triple sheer with shoulder length veil; Miss Eileen Burwell, sister of the bride chose a floor-length dress of peach sheer and lace with matching shoulder length veil and carrying a bouquet of yellow mums; and Miss Betty Burwell, younger sister of the bride was dressed in floor-length dress of old rose sheer with shoulder length veil and carrying a bouquet of mauve mums. Little Jo Ann Day was flower girl and she wore a floor-length dress of mauve satin and carried a basket of lavender and rose mums. The groom was supported by his brother, Mr. John Musgrave Jr., Fred Burwell Jr., the brides brother and Mr. Leonard Welsh were ushers. The mother of the bride wore a dress of olive green with carriage of pink carriages. The groom's gift to the bride was a handsome hand bag. To the three bridesmaids each a pair of earrings, to Mrs. F. A. Tustian, organist, also a pair of ear rings, to the flower girl a ring and to the best man a wallet.

The reception took place in the Masonic hall, which was festively decorated with crepe paper in the form of white wedding bells and streamers. The tables bore cloths of lace trimmed linen and bouquets of cut flowers. The bride was the recipient of a variety of lovely gifts. The young couple left on the afternoon train on a weeks honeymoon in Calgary. For going away the bride wore a red suit with burgundy coat and black accessories. On their return Mr. and Mrs. Musgrave will take up residence on a ranch two miles south and west of here.

SPECIAL RADIO PROGRAMS ON CHRISTMAS SEALS

H. Napier Moore, editor of MacLean's Magazine, will speak on a coast to coast hookup at 4.30 p.m., MST, Sunday, November 24th.

Mr. Moore will speak from Toronto, officially opening the 20th annual Christmas Seal Sale in Canada, which starts on November 20th, to raise the funds by which Canadian Tuberculosis Associations carry on their anti tuberculosis programs.

Senator G. G. McGeer will give a radio talk on the Western network of the CBC, Wednesday, November 27th, at 9.30 p.m., MST.

Senator McGeer is well known throughout the West, as "Gerry" McGeer, the former fiery mayor of Vancouver. He will also speak on the 1946 Christmas Seal sale and work of the Tuberculosis Associations.

Christmas Seal your Christmas mail

SNOW! SNOW! SNOW!

The town and district is gradually digging itself out of the heaviest snowfall for many years, when a storm broke on Sunday and piled up snow to a depth well over three feet in a little more than two days.

The storm badly disrupted the orderly distribution of food, etc., and milk deliveries were only available through supplies being left at central points; train service was behind schedule, and freight and express were only delivered under difficulties on Wednesday.

Everybody assumed the role of snowshovelers and cleared the main street, walk, "cata" were busy throughout the night moving the snow across the street and this morning the main highway through business section of town allowed resumption of services, although to a limited degree in town, while the road through the Pass is being kept open.

The storm caught a hunting party out in the Gap, which sought shelter at the Ranger's station and we understand effort is now being made to reach them.

As we go to press a light fall of snow is coming in from the west and all hope it will not reach proportions of the early part of the week.

USEFUL EUCALYPTUS

Generally associated in our minds with colds and influenza, the eucalyptus trees of Australia are playing a big and increasing part in present-day manufactures.

The range of their many useful products in the form of oil and timber for industry has been extended recently by improved processes for manufacturing paper from the short fibres of the trees.

A considerable amount of paper now being made in Tasmania, is made entirely from eucalyptus pulp, mixed with other wood pulp, it is helping materially to increase paper supplies.

It has now been found that eucalyptus products can also be used successfully in the manufacture of a great many plastic materials.

Work a little, sing a little,
Whistle and be gay;
Read a little, play a little,
Busy every day;
Talk a little, laugh a little,
Don't forget to pray;
Be a bit of merry sunshine
All the blessed way.

If you buy, fewer will die—Buy and use Christmas Seals.

BLAIRMORE GIRL ON AIR

The guest soloist on the Electric Hour Monday, November 25th, at 9.30 p.m. over CFPC will be Miss Natalie Minnie, daughter of Mr. and Mrs. C. Minnie, of Blairmore.

HILLCREST HAPPENINGS

On Sunday afternoon about 1200 people were present here, on Monday afternoon it was at least three feet and still continuing to snow. Roads were blocked on Monday till about three o'clock, when the snow from Bellevue came through.

A lovely miscellaneous shower was held in the Catholic hall November 14, in honor of Miss Josephine Rossi, bride-elect for December. The evening was spent playing whist and bingo. Whist prizes were won by Mrs. Adam Wilson, of Coleman, first and Mrs. Panek, consolation. The bingo prize was won by Mrs. Filippozzi. Mrs. Wane won the door prize. A dainty lunch was served by the hostesses, after which Miss Rossi was presented with an array of beautiful gifts, for which she appropriately thanked all those present. Hostess for the evening were Mrs. Cliverson, Mrs. L. Craig, Mrs. R. Anderson, Mrs. J. Craig, Mary L'pnicka, Mary Stanko, and Edith Spence.

LAC Andy Gardiner, of Winnipeg, was a visitor here last week with his uncle and aunt, Mr. and Mrs. R. Gardiner. After leaving Hillcrest he went on to Drumheller to visit his father, Mr. W. Gardiner, before returning to his station.

Mrs. G. E. Cruickshank was a visiting hostess last Wednesday evening. Mr. and Mrs. R. Draper are to be congratulated on the birth of a son, in the Bellevue hospital. A daughter, Sandra, was born to Mr. and Mrs. Ben Bachura last Friday.

Rev. Hueston, of Macleod, conducted the regular afternoon Sunday United church service this week, as Rev. Irwin was called upon to fill the pulpit in Macleod for their anniversary service. Mr. E. Womersley, of Blairmore, rendered a vocal solo. He was accompanied by Albert Christie, of Bellevue.

As long as one case of tuberculosis exists in a community no person is safe. Help seek out these danger spots of infection by buying Christmas Seals.

Young Man—Honey, I'm miserable all the time I'm away from you!
Girl—Oh, darling, if I could be sure of that, it would make me so happy.

MRS. C. F. DUNLOP PASSES

Ill for the past eleven months, death came quietly to Mrs. Rose M. Dunlop, in her Third street home in Coleman on Monday evening at 7.30 o'clock.

Born in Pictou, NS she received most of her education in the U.S. She came as a young woman to western Canada, and in 1901 married Mr. Charles F. Dunlop, in Fernie, B.C. In 1906 she and her husband came to live in Coleman, where she resided until her death.

She was predeceased by her husband in March 1918, Lieut. Dunlop being invalided home from overseas.

During her forty-one years residence in Coleman Mrs. Dunlop had taken an active interest in community affairs. In the early days she was interested in the building and progress of St. Paul's United church, and was an ardent worker in the Women's Institute.

During the First Great War Mrs. Dunlop was Secretary-treasurer for the local branch of the Red Cross, and held that office until 1939, and in the past year was an energetic worker for the society. In 1900 she became the first Noble Grand of Victoria Rebekah lodge, and the first Warden of the Rebekah Assembly in Alberta, and has remained an active member in that organization.

Early in the year her health began to fail, until this summer it was necessary for her to go to Calgary for treatment, returning home six weeks ago.

Her two daughters Mrs. A. F. Gillis, of Merritt, BC, and Miss Winifred, were at her side when she passed away. Also surviving are two grandchildren and three sisters.

Services were held in St. Paul's United church, today at 3 p.m., Rev. Dr. Magowan officiating. Due to the extreme weather the remains will be placed in the vault in Blairmore until conditions permit burial in the Union cemetery in Coleman.—Coleman Journal.

BODY LININGS

If the "linings" of the nose, throat and lungs are healthy, they will be colds, sore throat and pneumonia. Authorities of the department of national health and welfare, Ottawa, say that children require vitamin A for normal growth and everybody needs vitamin A to keep eyes, skin and body linings healthy. Vitamin A may be obtained by eating yellow and green vegetables, liver, eggs and dairy products.

Christmas Seals fight T. B.

DRAKE'S HISTORIC DRUM

Auckland Abbey, Devonshire home of Sir Francis Drake, where for years his famous drum hung in the main hall, is to be sold, and West Countrymen are wondering what will happen to the drum.

This famous relic, together with his sword, and well-thumbed Bible, accompanied the great warrior during his long roamings over unknown waters, and when, 358 years ago, he and his men returned from putting the finishing touches to the Spanish Armada, he proudly ordered his arms to be painted on the drum.

It is only a small, dim kettle-drum, rounded at the base, but scores of legends have grown up around it. None of these fires the imagination more than that when danger threatens England's shores, it beats in low, mysterious cadence, though struck by no mortal hand.

The beat of the drum is said to have been heard, too, during historic occasions—when the Pilgrim Fathers sailed away in the Mayflower, when Fairfax and Cromwell came to Plymouth to thank the people for defending the town during the long siege of the Civil War, when Admiral Blake lay dying as he was brought in to Plymouth, and when Wellington and his troops set out from Plymouth Port.

There are stories, too, of more recent date. When the German Fleet surrendered in November, 1918, men on the Admiral's flagship said they heard the long roll of a drum—Drake's drum, it was heard, too, so it was said, when the little ships saved the British Army at Dunkirk.

And as the sound has fallen on men's ears, they have said one to another in subdued tones: "Drum—drum!"

The illustrious trophy was removed to safety when fire destroyed the west wing of ancient Buckland Abbey in 1935, but was brought out again two years later at the homecoming of the men of the Exeter and Ajax after their victory over the Graf Spee. The crews were entertained at Plymouth Guildhall, and there they saw the drum. Its owner, Captain Merrick, a descendant of Sir Francis, came with his priceless heirloom, to keep an eye on it.

Whether the drum will find a permanent home beyond the Devon border time will tell. Anyway, Glorious Devon would be sorry to lose this relic which has so long resounded in Drake's own country and is a treasured reminder of her famous son.—C.N.

INDOOR GAMES

Such games as volleyball, badminton, basketball and handball, make it possible for most Canadians to enjoy some form of recreation at every season of the year. The department of national health and welfare, Ottawa, recommends year-round sports activity to those who would preserve their health. After games under such conditions as obtain indoors, it is suggested that a shower or bath in an indoor pool is wise, followed by a brisk towel-drying, to keep healthy.

JAPANESE VOLUNTEER TO GO TO JAPAN

The fifth and what may be the last party of voluntary Japanese representatives will sail from the west coast for Japan during the week of November 25th. It was announced today by A. MacNamara, Deputy Minister of Labor.

In the four previous sailings of this type, also 3,300 Japanese volunteered to go to Japan. It is anticipated that 175 Japanese will leave on this fifth sailing. Don't forget the sale of work and tea to be held in the IOOP hall on Saturday, November 16th, by the Salvation Army Home League.

Bumper Tobacco Crop

This year a record crop of tobacco was harvested in Canada—110,000,000 lbs. Due to the intensive work of Dominion Department of Agriculture plant breeders the improved varieties now grown in the Canadian producing areas make the importation of cigarette and pipe tobacco, except for blending of some brands, unnecessary. All Virginia type cigarettes made in Canada are of home grown leaf. These pictures show a field of high grade tobacco and workers getting leaf ready for curing and storing.

Increase Seen In Production Of Commodities

OTTAWA.—The labor department said that in the wake of recent strike settlements the outlook of Canadian industry is "optimistic" and predicted early "stimulated" increases in steel, electrical apparatus, automobile, rubber, chemical and brass production.

Of 26,000 workers involved in disputes at Oct. 1, all but about 700 now had returned to work.

"An extensive flow of goods (soon) will close the general demand-supply gap and relieve inflationary pressure," a department news release said. "The heavy consumer demand for all types of goods will probably maintain manufacturing employment in the next few months, thus offsetting its normal seasonal decline."

The overall situation had changed greatly since October, 1945. Since then the Dominion's economy had absorbed "thousands" of war veterans and more than 600,000 veterans. Unemployment now was "less than three per cent. of the labor force."

In the industrial regions of Quebec and Ontario, employment conditions show a marked improvement over those of October, 1945. The trend of activity in the economy-affected prairie and Pacific regions shows a steady recovery from the post-war low in the spring of 1946 to a level slightly above that of October, 1945.

"Unplaced applicants registered with the national employment service Oct. 31 totalled 134,000, a decrease of 8,000 from the Sept. 30 total. The latest figure was 26,000 less than at July 31."

Most jobs were found in Ontario, Quebec and the Maritimes, due to strike settlements and expansion in the logging industry. Unemployment increased in the prairies during October and remained stable on the Pacific coast.

At the end of October there were 133,000 unfilled vacancies in the Dominion, a 9,000 reduction from the total of 142,000 at Sept. 30.

Unplaced applicants in unfilled vacancies (in brackets) in western national employment service offices at Oct. 31: Calgary, 2,651 (408); Edmonton, 2,358 (250); Regina, 925 (565); Saskatoon, 1,478 (554); Winnipeg, 7,111 (3,525); Port Williams, Ont., 813 (1,850); New Westminster, B.C., 1,572 (444); Vancouver, 11,818 (3,200); Victoria, 1,900 (603).

POLAR EXPEDITION

Four Thousand U.S. Navy Men To Accompany Rear Admiral Byrd
WASHINGTON.—The navy is sending 4,000 men with Rear Admiral Richard E. Byrd to the Antarctic this winter to train under harsh polar conditions.

The expedition includes representatives of the army, navy, air force, forces, branches of defence which have had stiff tests in the frozen north, together with scientists.

Navy officials said a press conference 13 ships will carry the force leaving next month with one of its specific objectives to "consolidate and develop" the results of the Byrd expedition of 1939-41.

The officers discounted reports that a hunt for uranium, ingredient for atom bombs, was a prime intention, although they explained the expedition would be interested in any minerals discovered—and that uranium is a mineral.

Admiral Byrd disclosed that the Russians had an expedition "going down but we haven't much information on that."

Vice-Admiral Forrest Sherman, deputy chief of naval operations, was asked if one of the purposes was to stake out American claim to territory. He replied:

"The purpose of this expedition is primarily the training of naval units, and any effects these operations might have on the balance of conflicting claims to territories will be incidental only."

Admiral Byrd said his own statement "that this nation doesn't recognize any claims down there—and hasn't made any claims itself."

TRADE AGREEMENT

Britain And Russia Negotiating On Large Scale

LONDON.—Great Britain and Russia are negotiating a large scale trade agreement and Russia is now considering specific suggestions offered by the British delegates, well informed sources said.

According to reports, the proposed agreement would be on a much wider scale than previous arrangements between Britain and Russia.

It was understood that Russia had not asked for credit as a basis for purchase of goods in this country but must be prepared to supply goods in exchange, along with a relatively small payment in gold.

Russian delegates have indicated informants said, that they are especially interested in getting from British machinery, electrical engineering equipment, and machine tools.

ELECTRONIC PIANOS DEVELOPED IN VANCOUVER—Vancouver technicians, utilizing a magnetic principle never before embodied in a musical instrument, have produced an electronic piano. Instead of wire strings, it has tuned bars of magnetized steel as thick as a pencil set solidly in a heavy casting. When a bar is struck by a heavily-padded mallet, no mechanical sound is produced, but the slight vibration sets up a moving magnetic field which cuts across a coil of wire, inducing an electric current in the coil. Amplified, the current drives a speaker. Piano never needs tuning.

Sugar Rationing To Be Reviewed By Food Council

OTTAWA.—Whether Canadians will get a material increase in sugar for their tea, coffee, "cokes," ice cream, jellies, cakes and confections in 1947 depends on a meeting the end of this month of the International Emergency Food Council at Washington, D.C.

The council replaces the wartime combined food board managed by the United States, United Kingdom and Canada. The new council numbers some twenty different nations not including Russia which refused to join.

In 1946, the allotment of sugar per person by the combined food board among the three countries was 70.8 pounds per person.

In 1946, the allotment was increased to 72.8 pounds per person. In 1947 it is hoped the allotment will be raised to as much as least 75 pounds per person, and possibly to 80 pounds. That would still be about 18 pounds less per person annually than Canadians and Americans used in pre-war years when the per capita consumption of the two countries was around 98 pounds.

In 1939, Canada was using about 1,000,000 pounds of cane and beet sugar. The 1946 allotment of sugar to Canada by the combined food board was 804,000 tons which, on the basis of 2,000 pounds (short tons) would mean 1,008,000,000 pounds, equivalent to pre-war consumption. But in the interim, there has been a tremendous increased demand per capita for sugar due to increased production purchasing power plus also some increase in population.

Any increase in the allotment to Canada, the United States and the United Kingdom by the International Emergency Food Council will be very difficult to arrive at, but sugar growing in Europe, before the war, Europe was largely self-sufficient in sugar from this domestic source. The war cut it off. But European sugar beet growing is rapidly coming back.

Canada has also greatly increased beet sugar production from the pre-war five-year average, 1932-36, 141,700,000 pounds to an average of close to 180,000,000 pounds average for the last five years.

Estimates of Canada's 1946 beet sugar production indicate a total of 194,500,000 to 198,500,000 pounds. Two hundred million pounds of beet sugar is only from a quarter to a fifth of Canada's wartime rationed sugar use. For example, in 1945, whereas beet sugar production was 165,000,000 pounds, Canada imported 846,700,000 pounds of raw sugar; total available refined sugar including beet sugar and net imports or exports, was 980,400,000 pounds and actual domestic sales of refined sugar were 886,100,000 pounds.

All world sugar production is pooled. In 1946, the United States and her island possessions contributed 41 per cent. of the quota, the United Kingdom 25 per cent. and Canada 18 per cent.

STILL DECLINING

Butter Production During October Dropped Almost Nine Per Cent

OTTAWA.—Production of creamery butter in Canada during October dropped to 21,807,000 pounds from the 23,928,000 pounds produced in October, 1945, down almost nine per cent., the Dominion bureau of statistics reported.

All provinces shared in the decrease, which brought cumulative output for the first 10 months of this year to 245,994,000 pounds, against 268,752,000 in the corresponding period of 1945, a decline of 8.5 per cent.

Commenting on the decline, prices board spokesmen said it still was too early to determine whether the board would have to follow last winter's course and cut the individual butter ration, at present at six ounces per person, per week.

NATIONAL CONTESTS

Three Western Provinces Were Successful In Winning Farm Awards

TORONTO.—Junior farm club teams representing Saskatchewan and Quebec won two each of the seven competitions at the national contests of boys' and girls' farm clubs held on the grounds of the Royal Winter Fair, Provinces successful in one contest each were British Columbia, Manitoba and Ontario.

Quebec placed first in dairy cattle and swine, Saskatchewan was tops in beef cattle, won by Craik Beef Club, and seed grain, taken by Norway Seed club.

British Columbia won in the seed potato competition, with Richmond Potato club; Manitoba's Holland Poultry club came in first and the Vellere Home-making club of Ontario emerged on top in clothing projects.

Airline stewardesses flying the international run from the United States to England and Ireland lose as much as five pounds per trip.

Buy Christmas Seals . . .

Help To Make Our Homes Safe From Tuberculosis

During 1946, the Preventive Programme of the Saskatchewan Anti-Tuberculosis League was pressed with unabated zeal and results show that there can be no doubt it is succeeding in reducing tuberculosis in the province. The three mobile fluorographic units visited 157 communities where over 145,000 persons were examined at the expense of the Christmas Seal Fund. The 12 regular clinics were in operation throughout the year and family physicians were visited by the League's consultants.

Tuberculosis is needless and preventable. There is no need for tuberculosis to be No. 1 Disease Killer between the ages of 15 and 35.

If Christmas Seals have not reached you by mail you can obtain these Seals by writing to the Christmas Seal Committee at Fort St. John. Won't you help to continue and extend this Programme of Prevention so that this province can continue to be the safest place in the world for a child to be born.

BUY CHRISTMAS SEALS!

LIKELY CANDIDATE FOR PRESIDENT In the 1948 elections, Dewey's popularity seems to have gained strength in New York. He polled nearly a million more votes than the Democratic candidate, James M. Mead.

Food Crisis In Germany May Affect Britain

WASHINGTON.—Britain may have to slash rations to meet the food crisis in her zone of Germany because the American zone has little to spare, U.S. occupation officials said.

They said that while the United States has enough food in sight to maintain the daily ration of 1,550 calories in its zone for two months, it has not enough to prop the recently-raised British ration of 1,550 calories. They said Britain might even find it necessary to take in its belt at home to send more food to Germany.

U.S. occupation officials, headed by Lt.-Gen. Lucius D. Clay, and his adviser, Ambassador Robert D. Murphy, began conferences with U.S. and British government officials on economic unification of their zones. The conferences will deal chiefly with financial and economic aspects of the merger, pending further Russian and French decisions on unification of all four zones.

Among the matters that have to be threshed out are imports needed to bolster the German economy and the distribution of German exports. This is expected to bring up the food question, with the British pressing for quick action on imports and pooling of supplies to ease their severe shortages.

The British also are said to be pressing for immediate U.S. aid to relieve the crisis in their zone and are expected to urge sharing of food by the American zone.

One U.S. official said, "You can't divide that which is deficient." Thus the British may not get much satisfaction. There is talk, however, of a wheat loan from the American zone.

STUDENTS KILLED

SASKATOON.—Two University of Saskatchewan students, Franklin Tompkins and Adam Glingara, both of Brookville, Sask., were killed and three other occupants of their car were injured in a collision with a two-ton truck seven miles south of Cudworth, Sask.

MANLY F. MINER

The many friends of Manly Miner, president of the Jack Miner Migratory Bird Foundation of Kingsville, Ontario, will be interested in a recent honour which has come to him. At the meeting of the General Council of the United Church of Canada held in Montreal this Fall, Mr. Miner was elected to be a member of the Senate—the Board of Regents—of Alma College, St. Thomas, Ontario.

It was four years ago that Alma College honoured the late Jack Miner by establishing a Scholarship carrying his name—"The Jack Miner Scholarship"—to be awarded annually, with his granddaughter, Wilhelmina Conklin Miner, being chosen as the first recipient.

One can thus see at a glance the very warm and kindly feeling Manly Miner would have for Alma College.

The general committee in charge of all United Church colleges can rest assured that with Mr. Miner as a member of the Alma College Senate, they have a man who will at all times, under all circumstances, give his best to further the interests of this wonderful college for girls.

RECORD CROPS

WASHINGTON.—Favored by ideal fall harvest weather in October, the United States is virtually assured its largest output of crops in history, the agriculture department reported. A record production had been forecast previously, but unusually good weather the last four weeks, which improved acreage yields of many crops, brought the prediction to realization.

1947 PROGRAMME

In 1947 it is hoped that the balance of the entire province will be covered for the first time by the three fluorographic units.

Prevention of tuberculosis in Saskatchewan is supported by the Christmas Seal Campaign. This year, a Seal tells its own story. It pictures the lamplighter on his rounds spreading the light that dispels darkness.

No home is safe from tuberculosis until all homes are safe.

BUY CHRISTMAS SEALS!

South Africa To Annex Mandated Area

LAKE SUCCESS, N.Y.—The Union of South Africa served notice that it will annex the mandated territory of Southwest Africa whether the United Nations general assembly approves it or not.

Field Marshal Jan Christian Smuts, South Africa's prime minister, threw his take-it-or-leave-it proposals into the assembly's trusteeship committee in the face of Soviet-led hostility to the South African proposal to take over the territory.

Southwest Africa, owned by Germany until the end of the First Great War, has been administered by South Africa since then as a League of Nations mandate.

The South African pronouncement came after the United Nations had thrown its weight behind the annexation bid. Arthur G. Bottomley, British delegate, warmly defended the South African proposal before the United Nations trusteeship committee. Soviet Ambassador Nikolai Novikov previously had denounced the proposal as a flagrant violation of the UN charter.

Bottomley said that the UN charter did not forbid a nation to put its mandated territory under trusteeship and that "credit is due to the South African government" for giving other nations the opportunity of expressing any opinion on its proposal.

Bottomley said that the United Nations was "satisfied" with the polls taken by South Africa to determine whether the natives of Southwest Africa wanted annexation. Novikov had denounced the South African figures as a "delicious demonstration."

Dimitar Vlahov, following for Yugoslavia, told the committee that "Yugoslavia energetically opposes" the South African proposal.

"We'll never permit aggression in any way," Vlahov said.

The Yugoslav echoed Novikov's assertion that the proposed annexation violated charter principles, and charged that the South African poll had been confined to tribal chieftains and thus did not reflect the wishes of the majority of the natives of Southwest Africa.

Cuba's Dr. Guy Perez Cienfuegos also attacked the proposal as "contrary to the letter and spirit of the charter" and urged a UN trusteeship for Southwest Africa.

Smuts flatly rejected demands by Russia and Yugoslavia and some of the smaller United Nations states that Southwest Africa be placed under UN trusteeship.

"In view of the clearly expressed wishes of the inhabitants of Southwest Africa," Smuts said, "it would not be possible for the Union government to permit aggression in any agreement in conflict with those wishes."

DOES NOT APPROVE

United States Will Oppose Present Plan For Europe Food Fund

LAKE SUCCESS, N.Y.—Reported United States opposition virtually ruled out any proposal to set up the United Nations would approve a proposed \$400,000,000 emergency food fund to help meet Europe's food deficits after the expiration of UNRRA. Shortly after Dean Acheson, acting secretary of state, indicated in Washington that the United States would oppose the proposal put before the United Nations by F. H. LaGuardia, director-general of UNRRA, informants said, the United States delegation were understood to have taken the position that any further aid to Europe after the expiration of UNRRA should be handled by a national rather than an international basis.

This was interpreted as meaning that the United States would in the future handle her own relief distribution in Europe. Under Mr. LaGuardia's proposal the United States would be expected to contribute 49 per cent. of the total \$400,000,000. It was generally agreed that the plan would not be put into effect if the United States refused to take part.

Automobile Prices To Remain At Same Level

OTTAWA.—Announcement by General Motors corporation in Detroit of a \$100 increase in the retail price of automobiles has not met with any change in the price of Canadian-made cars, the prices board said.

Canadians will have to pay extra on imported General Motors cars but the cost of made-in-Canada automobiles remains at the present level. A board spokesman said that a Canadian manufacturer may increase prices only if he proves financial necessity.

SALVAGE ATTEMPT

CAPTOWN.—Attempts are being made to salvage the 8,093-ton British steamship City of Lincoln, which sank with 22,000,000 (\$30,000,000) cargo near the Cape of Good Hope after striking a rock. An inquiry is to be held concerning the wreck.

ABSOLUTE ZERO

By "absolute zero" is meant the
lowest temperature compatible with
heat—that point of temperature, in
fact, at which a body would be wholly
deprived of heat and at which the
particles whose motion constitutes
heat would be at rest. This tempera-
ture is supposed to be about 273 de-
grees C. or 460 degrees F.

The term "heat" is here used in its
scientific sense, for as men use the
word in every-day language its sig-
nificance depends on the temperature
of the human body. Men call "warm"
anything with a temperature higher
than their own and "cold" all those
objects which have less heat than
they. In reality, however, the coldest
body known to man is far from being
utterly without heat.

Ice, for example, has heat, only in
a degree so much below man's tem-
perature that one can scarcely im-
agine it to be anything but "cold," a
term which actually implies a com-
paratively low degree of heat.

Accordingly the zero of thermo-
meters is only a conventional point
marking a certain degree of heat.
There seems to be a point, however,
where heat ceases absolutely, and this
is the point which is known in chem-
istry as "absolute zero."

The writer has seen liquid air made
to boil by putting a lump of ice in it.

The liquid air was so intensely cold
that the ice was very hot by compar-
ison.

INCREASED SEPTEMBER CON- TRIBUTIONS TO UNEMPLOY- MENT INSURANCE FUND

Employer-employee contributions
to the Unemployment Insurance
Fund made in September, amount-
ing to \$3,594,233.84, were the high-
est for any September to date, ac-
cording to the statement for that
month just released by the Unem-
ployment Insurance Commission.
The latest figures show an in-
crease of \$1,101,820.90 in the
monthly sum received by the fund,
over the corresponding month of
last year, and of \$453,875.70 over
the average of the previous eight
months.

By reason of the adoption of a
new policy of closing expenditure
figures at the end of the month
instead of on the 20th of the month
as formerly (which resulted in an
extra ten days' benefit payments
being reported for September)
benefit payments in September
amounted to \$3,308,161.44, com-
pared with \$2,558,005.66 in the pre-
vious month.

Also paid into the Fund in Sep-
tember were the sums of \$1,198,
850.77 contributed by the Dominion
Government and \$600,058.54 from
the interest on investments and
profit on sale of securities. The net
increase of the fund in September
was \$4,395,061.71, bringing the
balance at September 30th to \$337,
819,234.70.

Under the Unemployment Insurance
Act, the Canadian government
pays all the costs of administering
unemployment insurance and the
National Employment Service, in
addition to its share of contribu-
tions to the fund. This means that
no expenses incurred in the man-
agement of unemployment insur-
ance are charged to the fund.

Character is so largely affected by
associations that we cannot afford to
be indifferent as to who and what our
friends are. They write their names in
our album, but they do no more. They
help make us what we are. Be there-
fore careful in selecting them and
when wisely selected, never sacrifice
them.

THE THINGS THAT MONEY CAN'T BUY

HEALTH; A HAPPY HOME; opportunity
for your children; your own peace of mind
—these are priceless gifts. You can't buy
them with money.

But reasonable financial security, based on
a planned programme of personal saving,
can help to guard and guarantee them.

Take your Victory Bonds, for example.
Pretty reassuring to have them tucked away
as a financial reserve, always "on tap" in

time of opportunity or need. Pretty con-
vincing proof, too, that you really can save
when there's a real saving job to be done.

Perhaps today's rising costs or other fac-
tors are making it hard for you to carry on
your savings programme. By the time you
have met all your expenses; perhaps there's
mighty little left for that all-important
item marked "Savings".

Try putting savings first, not last, on

your budget list. Owe yourself a definite
amount each month, and make sure you
collect it. It means careful budgeting, and
putting off buying a good many things you'd
like to have. But never forget—this is your
share of what you earn. This is the part
of your income which will help to assure
for yourself and your family all the things
that money can't buy.

PERHAPS YOU are already one of the
hundreds of thousands of thrifty Canadians
who have a savings account with the Royal
Bank. If not, we invite you to come in and
open one. Perhaps your first deposit will
have to be small; don't
let that worry you.
The important thing
is to start. It will be a
pleasure to serve you.

THE ROYAL BANK OF CANADA

BLAIRMORE BRANCH - M. G. SMITH, Manager
BELLEVUE BRANCH - L. B. LONG, Manager

HAVE YOU ANY RUPEES IN YOUR PURSE?

Mrs. Blair has been talking for months about buying a real
Indian shawl. But wouldn't she be surprised if she found
it priced in rupees! That it isn't, is due in large measure to
the services rendered by your bank.

When you buy imported goods in Canadian stores, you pay in
Canadian dollars—but the people who made them were paid in Indian
rupees, British pounds, French francs...

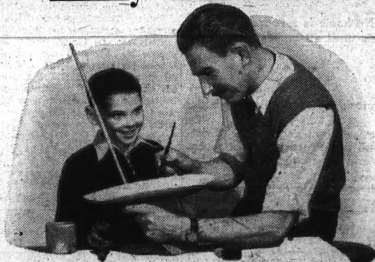

It is the same in reverse with exports. You may be one of the three
out of every eight Canadians who make their living through goods
sold abroad. If so, you receive your wages in dollars, but your prod-
ucts are sold in all sorts of foreign currencies.

Arranging the complicated exchange and transfer of foreign funds
in such transactions is but one of your bank's many services enabling
Canadians to buy and sell abroad.

Every FATHER

...should answer these questions:

"How much are my savings really
worth?" The real value of your
savings is not what counts most.
What is important is the amount
of continuous income they would
provide, if your wife and children
were left without other means of
support. In most cases, ordinary
savings can't provide enough! That
is why you need life insurance...
"Is it important WHICH life in-
surance company I choose?" It
is! Life insurance companies are
much alike as to policies and rates,
but actual long-term results vary
widely. We invite you to compare
The Mutual Life of Canada's record

with that of any other company.
Evidence of the satisfaction of
our policyholders is furnished by
the fact that whole families and
succeeding generations have entrusted
their life insurance programs
exclusively to The Mutual Life of
Canada, and each year approximately
35% of its new business comes from
policyholders. Ask your Mutual Life
representative to explain the special
features of this Company.

THE LEGION NEEDS YOU!**

A month after an Associated Dairies milk-wagon driver joined the Westminster Regiment he wrote home to his girl from camp: "Say, honey, this army life sure is swell. Every morning I sleep in till six-thirty!"

Who is the devoted hostess in Bellevue who brings breakfast to her guests while they are still in bed?

Isn't it remarkable how many useful errands children can find for parents to do just at bedtime?

RUBBER RETURNS

No more synthetic rubber it to leave the United States for Great Britain, and only natural rubber will be imported for the making of tires, balls and the thousand and one things for which it is necessary.

The history of rubber goes back beyond the days of Columbus. When he made his second visit to America some natives of Haiti were seen playing with balls that bounced, and some of these curios were brought back to Europe. The substance with which they made their bouncing balls the natives called "caoutchouc," a word that still appears in our English dictionaries.

In 1770 the great English scientist Joseph Priestly obtained some of this substance, and used it as a means of rubbing out pencil marks. This is how the English word "rubber" originated.

Rubber comes from a juice found in several kinds of trees, vines, and other plants in various parts of the world. Its main source, however, is the hevea tree, which grows in South America, particularly in Brazil. In 1873 a consignment of hevea

seeds was obtained from South America and planted at Kew Gardens. Only a few little trees grew, but six of these were sent out to India, to form the beginning of a hevea plantation. A few years later the English planter, Sir Henry Wickham, obtained a much bigger consignment of hevea seeds, had them planted at Kew, and supplied 2,000 of the resulting seedlings to Ceylon, Malaya, Sumatra, Java, and other Asiatic lands.

UNDER-NOURISHMENT

Many common ailments are due to under-nourishment, declares a food authority of the department of national health and welfare, Ottawa. "Too often," says the expert, "illness is blamed on something eaten, when it may be due to something which should have been eaten, but was not included in the diet at all. Of such ailments are headache, stomach-ache and fatigue." Nutrition authorities say that such healthful foods as milk, fruit, vegetables and meat or meat alternates are essential to the daily diet.

To those who eagerly await their new cars or trucks... here is the

LATEST NEWS ABOUT GENERAL MOTORS DELIVERIES

Everybody from factory to dealer is doing everything that can be done to speed deliveries to you

Because of the continued and unavoidable shortages of various materials, production of new cars and trucks has remained behind our expectations. As a result, shipments of new cars and trucks to dealers for delivery are still far below the level we and the factory had hoped to attain by this time.

We know that General Motors is doing everything possible to step up its production totals—to ship more and more cars and trucks to us and to its hundreds of other dealers throughout Canada... and we know, too, that we are assured of getting our full proportionate share of the current and future output.

Of this you may be sure: We shall continue to make deliveries

of cars and trucks to our customers as fast as we receive them; we regret delays as deeply as you do; we thank you for your friendly patience and understanding; and we promise you a new high motoring experience when you do take delivery of your new General Motors car or truck.

Keep Your Present Car or Truck Running
Meanwhile, may we suggest that you safeguard your transportation by bringing your car or

truck to us for service now and at regular intervals. Let us help you to keep it in good running condition—to maintain its performance, appearance and resale value—until the day when your new General Motors car or truck comes along.

Still On The Job

Women Continue To Keep Sharp Eye On Price Control

One thing about women, when they have been given a job to do they stick it out to the end.

A recent Quebec tour convinced Corinne de la Durantaye, assistant director of the consumer branch of the prices board, that both French and English-speaking Canadian women are keeping as sharp an eye on prices and shortages as they did during the war.

"I never thought women as a whole could be so interested in economy problems," said the assistant director, as she told of the crowded meetings where not only the housewives, but business and professional women, came to ask questions connected with shortages and price control.

The old Roman alphabet had no j, u, or w.

The Quality Tea

ORANGE PEKOE

OUR COMPLETE
SHORT STORY—

DISCOVERY

By LORNE BALSLEY

Copyright
Wheeler Newspaper Syndicate

THE silence in the second grade room became terrible. In desperation Junior drew a long breath and started out stammering. "I—found—I—was—on—a—"

"I—was—on—a—"

"My goodness," old Miss Carson rasped out. "I thought every boy knew what Robinson Crusoe was wrecked on." She paused, dreadfully, then corrected, "Island."

He sat down suddenly, not tears trying to creep out. He heard some one snicker, but he dared not look. He did not know who Robinson Crusoe was. He did not know what he had read. For that matter, he never knew what life was. Although for days the rest of the class and he had been reading from books and the blackboard, the words meant nothing. He would look at the page with its large black type, and feel the shiny paper under his hand, but he was not conscious that those words had anything to do with life as he knew it. F-o-u-n-d was in the book, and if he made the noise "found" the teacher was satisfied. That "found" was something that actually happened, never occurred to him. It was just a sound.

The bell cut short his thoughts. He scampered out with the rest, but he did not want to play, though there had been a fresh fall of snow and the boys were planning a snowball fight. He wanted to get home, because he felt, made, like his shoe felt when the shoe rubbed the heel. So he went straight home to the living room, and climbed into the big chair, and tried to think.

He could hear Mother, working in

the kitchen. The noise disturbed him vaguely. Then, too, the events of the afternoon kept coming back.

He jumped up and went to the bookcase. Mother read to him a little each night, and in the last three years he had had stories in his books read many times over. He knew them all by heart, but at each reading they seemed new again. When mother read, it was not a lot of sounds like in school, but a succession of pictures like a movie. It was as if he were standing right there, and seeing the boys and girls, houses and ships, animals and birds. It was exciting and thrilling.

He selected a large book, the most thumbed of the lot, and carried it confidently to the kitchen. "Mother," he said, "please read to me."

But mother was busy at the stove. "Not now, dear," she said.

Again baffled, Junior wandered back to the living room and stretched out on the rug, tummy down, the book before him. The cover was bright with color and interesting. He turned the pages and looked at the pictures. He stopped at a full page illustration showing a goat with a long white beard and dark twisted horns. On the same page, lower down, were a cat and a dog.

The goat was familiar. He was the hero of several of the books, and Junior had seen him so often in his mental-movie-picture-show that every detail was old and friendly.

The caption at the bottom caught his eye. "Out some more printing like in school," he thought, looking at it contemptuously. Suddenly the beginning of it began to stand out clearer. It almost seemed to leap up. It said: "Beardie—"

Beardie? Beardie? Why, Beardie was the name of the goat in the story! Junior had often seen him in his moving pictures. And, of course, the goat in his mind looked just like the goat in the picture. The picture goat was right about the printing which said, "Beardie." So the printing, the picture in the book, and his own moving picture were all the same thing!

Junior was interested. He looked at the printing again. It said, "Beardie" and his friends. Then he understood. The dog and the cat were the goat's friends. He had often seen them before, too.

His eye wandered to the page opposite which was filled with large type. Suddenly, near the top, there stood out "Beardie." Then he understood. The dog and the cat were the goat's friends. He had often seen them before, too.

His eye wandered to the page opposite which was filled with large type. Suddenly, near the top, there stood out "Beardie." Then he understood. The dog and the cat were the goat's friends. He had often seen them before, too.

His eye wandered to the page opposite which was filled with large type. Suddenly, near the top, there stood out "Beardie." Then he understood. The dog and the cat were the goat's friends. He had often seen them before, too.

His eye wandered to the page opposite which was filled with large type. Suddenly, near the top, there stood out "Beardie." Then he understood. The dog and the cat were the goat's friends. He had often seen them before, too.

the gap and take the picture up on the other side. The first time he tried it, Junior was afraid the picture would not start up again, but it did, just as nicely as before.

Suddenly the book came to an end. Junior, startled, blinked his eyes. The room was almost dark, the afternoon had gone.

"Why, Junior!" said Mother coming into the room. "You mustn't look at those pictures in the dark. You'll hurt your eyes."

Junior didn't care about his eyes. He was wondering where the afternoon had gone.

"Come," said Mother. "Put away the book and wash up for supper."

Junior got up slowly and walked to the bookcase. "Where did the afternoon go?" he kept wondering. "It must have gone into the book," he concluded, replacing it on the shelf.

He thought of school, but the smart was gone, and he looked at the shelf with new interest. There were twelve or fifteen books on it.

"Gee," he thought. "What a lot of afternoon!"

Canada's Shortening Supply Seen Improving

Manufacturers Are Asked

To Step Up Production

OTTAWA—Shortening, which has been in drastically short supply in Canada for months, is expected to improve markedly during the next six weeks, prices board officials said.

Manufacturers have been asked to produce on a basis of 100 per cent. of their 1941 production.

In addition, a large shipment of shortening from Argentina, which Canada obtained during October and which was held up at New York due to a longshoremen's strike, started to arrive in Canada recently.

Officials said there was not certain exactly how these factors would affect the situation, but said they believed the shortening picture would be "brightened considerably" in a few weeks, barring unforeseen developments.

CANADA WORLD'S LARGEST

EXPORTER OF WHEAT

Most of the world's wheat production is consumed near where it is grown, so that only about one-tenth or 650 million bushels moves overseas into what is called international trade. The greatest wheat producing country is China which grows about one billion one hundred million bushels a year. Russia comes second, with an average of one billion bushels a year. The United States is third, with an average around 900 million bushels a year, and Canada is usually fourth, with more than 400 million on the average. While Canada is but the fourth largest wheat producer in the world, she holds a distinguished place. She is the largest exporter of wheat and produces the highest quality wheat. This quality in the past has always given her an advantage over her competitors.

There are two basic types of make poison, one of which attacks the victim's nervous system, the other the blood cells.

NOW AVAILABLE IN 1/2 LB. TINS

Some Big Tunnels

One Between Switzerland and Italy Is Longest For Traffic Purposes

One of the many thrilling experiences of Canadians who make a holiday or business trip to the Pacific coast is to behold the ingenuity of the engineers who built and designed the Connaught tunnel, which pierces the Selkirk. It is 5.02 miles in length and its construction shortened the railway line 4.3 miles. It was commenced in 1913 and finished in 1916.

South African engineers have started the construction of a tunnel which will be eight miles in length to improve the railway line between Cape Town and Johannesburg. Work on the first of four tunnels is underway. When they are completed the result will be to straighten out one of the most tortuous railway sections in the Union. They will also mean a saving equivalent to 13 complete circles which trains now have to make on their way up and down the Hex River Mountains.

No estimate is available of the cost of the South African tunnels, but the Connaught tunnel through the Selkirk summit cost approximately \$45 million to construct. Most of the long tunnels in the world are used in water supply systems. The great Simplon tunnel, which connects Switzerland and Italy, is probably the longest used for traffic purposes. It is 14.25 miles in length. The Pennsylvania Railroad tunnel connecting New Jersey and Long Island is 11.7 miles. The Hudson and Manhattan tunnel is 8.5 miles in length.

The tea plant is indigenous to South East Asia and it was hundreds of years until the Chinese knew of its existence.

Lucky Dog

Wire-Haired Terrier To Have The Care Of A Nurse

VICTORIA—In a swank suburban home, a wire-haired terrier will spend its declining years on a \$1,000 a year income.

A nurse will care for the dog's needs, and she will get a salary of \$75 a month plus the \$1,000 annual income for the five-year-old terrier. On his death, the nurse, Miss A. M. Cartwright, will receive \$5,000.

This is all provided for in the will of Mrs. Charles J. V. Spratt, who when her husband died some years ago took over his shipyard and operated it during the war years. Wealthy Mrs. Spratt had no close relatives, and she directed that the house should not be sold while the terrier lives.

A FRIEND INDEED

NEW YORK—The adage that a friend in need is a friend indeed had an international application and a strange twist for Julian Snyder, who sent a friend in Holland a carton of cigarettes when he heard that smokes were selling for \$3 a package on the Dutch black market. Recently he heard from his friend in Europe: "Hear you have shortages too. Sugar is rationed here, but we are able to help our 'rich uncle in America' by sending him three kilos (six and a half pounds) of sugar, which is now on the way."

A RARE STAMP

A rare Nova Scotia one-shilling (20 cents) stamp brought \$90 (\$400) at a dealers auction in London. The stamp, printed in 1851 incorporated the royal crown and heraldic flowers of the United Kingdom.

LIFE can Begin
AFTER 40, IF.

Around 40 our energy lessens. But experience has taught us to do our work with less effort. The years ahead should yield the greatest accomplishments, the most enjoyment and happiness. They can, too, if we avoid the kidney and bladder disorders such as Backache, Headache, Rheumatic Pains, Lumbago, Loss of Sleep and Energy which so often attack these round 40. For over half a century DODD'S KIDNEY PILLS have been helping men and women to keep kidneys and bladder in good order. If you are over 40, get a box for the sake of your health and a happier future use DODD'S KIDNEY PILLS today!—485

"I'd like 11,506,651* others to hear this"

"No post mortem!" warned Idd, glancing at Ruth. "The game's over. Besides, your husband looks as though he has something on his mind."

"I sure have," said Bill. "Only I'd like the other 11,506,651 Canadians to hear this too. To-day I got hold of some figures that made me proud of the business I'm in. We Canadians now own more than 10 billion dollars worth of life insurance. And payments! During 1945 alone, the companies paid out about 66½ million dollars to widows, children and other beneficiaries. And another 93 million dollars was paid to living policyholders through matured endowments, dividends, disability claims, annuities and cash surrender values. That's what life insurance is doing for us Canadians."

"These life insurance benefits helped to pay off mortgages on homes, start youngsters off to college, settle older people into comfortable retirement. Countless families have thanked their stars for life insurance in time of need. Many, many others who are now building future security through their policies will be glad of it. But I want every living Canadian to realize the importance of Life Insurance."

Every life insurance dollar, while waiting to be paid out to its claimant, is working and growing in the service of the public, creating more jobs and more goods for more Canadians. Of that dollar about 37 cents is now invested in Government bonds, 5 cents is laboring for municipalities, 20 cents is building industries and public utilities from coast to coast, 8 cents is in farm and urban mortgages, another 5 cents is on loan to policyholders, 1½ cents is represented by real estate and 3½ cents is in cash and miscellaneous assets.

Life insurance not only grows in the scope of its protection, year after year, but is continually being employed for socially desirable purposes.

A message from the Life Insurance Companies in Canada and their agents.
*Population of Canada, 1941 census, 11,506,651.

Local and General Items

Buy Christmas Seals

Rev. McKelvey was on the sick list during the week.

Born: To Mr. and Mrs. C. Drain, a son, on Sunday, November 17.

The first Christmas Seal Sale was held in Denmark in 1904, the idea of Einar Holboell, a postal clerk.

Mr. and Mrs. Frank Morgan are spending the winter as the guests of Mr. and Mrs. Evan Morgan.

Mr. and Mrs. Weldon Kearney, of Camrose, are visiting with Mrs. Kearney's parents, Mr. and Mrs. C. H. Erikson.

The stormy weather necessitated the postponing of St. Anne's Bazaar, scheduled for Wednesday, to next Wednesday.

Only slight damage was caused to the home of Mr. J. Miseraacca when fire broke out in the basement last Monday night.

Born: To Mr. and Mrs. Aldo Vanoni on Sunday, November 10th, at Perry's Maternity Home, a daughter, Paulette Diane.

Guests at the home of Rev. and Mrs. James McKelvey are Mrs. McKelvey's parents, Rev. and Mrs. J. L. King, of Enderby, BC.

Last week Messrs William and Roach Oliver went up to the Gap, on a hunting trip, the return trip has been delayed owing to the heavy snowfall.

Not so sure we appreciate being kept awake at night by "cats," but it is alright when no less than three were used to clear snow away from heavily blocked streets and alleys.

Mrs. Munro and child, of Calgary, are spending the winter in town with Mrs. Munro's parents, Mr. and Mrs. W. Patterson, pending posting of her husband who has joined the permanent force.

Mrs. Geo. Maniquet, of Dawson Creek, BC, is spending a few weeks in town visiting her parents, Mr. and Mrs. Isaac Ren. Her daughter Frances who accompanied her will spend the winter in town to attend school.

The store owned and operated by Mr. Brazzoni in Bellevue and entire contents were destroyed last Wednesday night by a fire believed to have started in the basement. The adjoining building owned by Johnson and Cousens was also damaged.

"V"

A farmer and a professor were sharing a seat on a train. It was getting lonesome so the farmer started a conversation and they soon became a friendly pair.

"Let's have a game of riddles to pass the time," said the professor. "I have a riddle you can't guess, you give me a dollar, or vice-versa."

"All right," replied the farmer, "but as you are better educated than I am, do you mind if I only give you cents?"

"O.K.," said the professor. "You go first."

"Well, what animal has three legs walking and two legs flying?"

"I don't know. Here's a dollar. What is the answer?"

"I don't know either. Here's your fifty cents," replied the farmer.

FOOD RULES

Be sure you get all the food value your body requires, advises an authority on nutrition at headquarters in Ottawa of the department of national health and welfare. "If you want to look, feel and do your best, be sure to get all the necessary food elements," says the expert, who points out that Canada's food rules, copies of which may be obtained, free, from the federal health authority, indicate such healthful foods as milk, fruit, vegetables, whole grain cereals and meat or meat alternates,

WINTER SPORTS

Announcing that free copies are available, on application, of its booklets, "Better Health through Skiing," the department of national health and welfare suggests to Canadians that they begin, now, planning their personal program of winter sports activities. The department comments upon the all-year-round sports facilities in Canada and on the value of some form of recreation at all seasons.

"V"

Tuberculosis being a communicable disease is everybody's enemy. One way of fighting this disease is to buy and use Christmas Seals.

TO WHOM IT MAY CONCERN

My wife, Rosie Terlecki, having left my bed and board, I will not be responsible for any debts incurred by her from this date, November-15, 1946.

(Signed) FRANK TERLECKI, Hillcrest, Alberta.
